Copy of report to accompany the estimate for Deepening the well in the Dt. Supdt's E of Police's Quarters Bellary

Amount of Estt. Rs. 105/-

The well in the D.S.P. quarters is now 27' deep & of 17'-0" x 15'-6" inside dimensions. At this depth it is filled in with fallen debris. The well in the adjacent compound ie. Dt. Supdt's qrs. is 41' deep & there is now about 6' of water. The difference in ground level is about 6'. We may therefore presume that the water level in the well ie. Dt. Supdt. of Police quarters will be 6' lower than the well of the Dt Supdt's. The total depth to be excavated will be may presume to be 47 This estimate therefore provides for deepening the well to about 47' through strata of varying hardness whose composition cannot be determined now. The north & south sides are not protected with revetment from the hard Gravel level to ground level. Provision is therefore made for this item as well. The estimate further provides for putting the motor arrangement in working order, as there is one on the west side

A data sheet is attached for rates allowed.

Doubtful. Bellary will be make heavy work in excavating. 1/3 of this estimate cost comes under that head.

We may accept this.
